again, a usefual active session.

Lots of good ideas. Never had heard of Dropthought before.

It was great but I was also looking for info on evaluating course design. Did I miss something in the course description???

Lots of good resources. Will definitely need to review the powerpoint slides.

Specific and tangible tools to implement immediately - thank you!

thank you

It was very helpful.

Ann is a very clear presenter and provided some excellent examples I can use at my university.

It was a very informative session, we liked how the tools and principles were incorportated.

Learned alot and enjoyed it. Like interaction.

I would have preferred a condensed version of the webinar.

I thought the content presented today was too geared towards large, well established online programs. For example, the emphasis on peer assessments really does not work with a small online program that includes a lot of part-time faculty.

Appreciated all the links to resources.

Learned of new tools to use in evaluating faculty teaching!

Very good information on the bigger concepts, but presenter spent too much time providing instructions on completing surveys. I think we can figure out how to enter info on a survey. :-/

There were some useful materials and suggestions. Providing some practical ways of using these materias or modifying them would be helpful.

This session covered the material advertised.

There were some very good tools and suggestions shared.
