Continue what you are doing.

---

Got a late start on the Pandemic Series, but was able to complete them efficiently.

Thanks for arranging this for the summer, and for the great support of faculty during this time. I know for a fact of other schools that are not doing anything like this amount of training, which have more resources to work with.

---

Please have this workshops available in elearn so we could access them as needed basis

---

Thank you for offering this series.! The mixture of external and in-house presenters was great. Adding specific examples of several of the ideas, such as using discussion boards as assessment tools. What does the assessment look like, as well as examples of student posts?

---

I really enjoyed all the workshop. It was a very valued training needed to prepare me for virtual instructions.

---

None

---

I really enjoyed my experience and learned so much in the process. THANK YOU!

---

The information could be distributed in a pdf file through email, that would take much less time to read. Live webinar wastes time.

---

Some presenters were good and knowledgeable, but others were not. I already had the information covered in several workshops because of presentations in my department and my experience as an online teacher.

---

I would very much like more instructional design courses for both online and face to face classes. These were very helpful especially the ones by Dr. Tobin, and the one on alternative assessment. Great and helpful information.

---

the session were too long.

---

LOVED THEM ALL! Thank you, Cheryl!

---

I would like a step-by-step pdf or written (not verbal) interative learning program for NearPodd. It is so dense, and I would benefit from having instructions I could refer back to.

---

I am VERY PLEASED to see TSU pro-actively preparing faculty in effective virtual instruction to meet the students' educational needs.

---

Excellent session today by Dr. Tobin!
