TESTIMONIAL FOR THOMAS J. TOBIN

Dr. Tobin's recent keynote presentation and deep-dive workshop for the University of Missouri's Celebration of Teaching faculty-development event was a smashing success! His subject matter expertise on teaching generally, and universal design for learning specifically, is vast.

It is matched by his careful attention to how colleagues will experience his sessions; as such, he practices what he preaches for inclusivity and accessibility.

By engaging with Dr. Tobin on UDL, our educators are better equipped to teach and learn with human beings who naturally need to connect, engage, and share in a variety of ways to realize their true authentic selves on the pathways to academic and lifelong success.

Thank you, Tom!
